SKILLS

Languages: Typescript, JavaScript, Python, SQL, Java, C++

Frameworks/Technologies: React.js, Next.js, React Native, Node.js, FastAPI, GraphQL, Prisma, MongoDB, MCP-servers, Langchain

Developer Tools: GitHub, Docker, Postman, Cursor, AWS, Postgres

Core CS: OOPS, Computer Networks, TCP/IP networks, DBMS, SQL, OS, Gen AI.

EDUCATION

- **Dayananda Sagar College of Engineering** Bengaluru, KA
B.E in Information Science (VTU); SGPA: 9.0 2022 – 2026

EXPERIENCE

- **Clear (formerly ClearTax)** Bengaluru, KA
Software Engineer (Full-time) — converted from 6-month internship Nov 2025 – Present
 - **Backend:** built and tested scalable APIs using **GraphQL** and **FastAPI** (Python), contributing to backend feature design and improving service reliability across production services.
 - **App/Frontend:** worked across the stack on **React Native** and **Android**, implementing features and resolving platform-specific issues in production.

PROJECTS

- **Music Labs (Realtime)** – *React.js, Postgres, Typescript* [Github](#)
 - Built an app that connects people across states and countries to listen to music synchronously, increasing community engagement. Replaced long API calls with WebSockets, improving sync efficiency by 70%.
 - Led the transition to RESTful APIs with CRUD functionalities, implementing admin sections and user modules.
- **Splitmate-app** – *Typescript, React-Native, Nativewind* [Android App Package](#)
 - Developed **Splitmate**, a lightweight React Native application for managing shared expenses with friends. Implemented features like bill splitting, adding payments to friends, and offline-first local data storage.
 - Optimized for efficiency with small app size, ensuring smooth performance even on low-resource devices. Added share-history-to-WhatsApp with proper formatting in one click.

ACHIEVEMENTS

- **Clear Hackathon Season 4 — Winning Team** – *Team “Stop Loss”, Rs. 1,75,000 prize* 2026
 - Selected as one of three winning teams out of **40+** teams competing across functions in Clear’s largest internal hackathon; winning projects were taken forward into production.
 - Built the project with a five-member cross-functional team under a fixed hackathon deadline.

EXTRACURRICULAR

- **Eth-India 2023** – *Volunteer, Tech Team*
 - Volunteered at Asia’s largest blockchain hackathon, efficiently managing Wi-Fi systems to ensure seamless connectivity for participants.
- **Problem Solving** – *Data Structures and Algorithms, SQL*
 - Solved 550+ high-quality problems, optimising for better time and space complexity.
 - Accomplished Leetcode SQL queries, solving top 50 problems.
